Assem Mohamed Saad Mohamed

BACKEND ENGINEER

Hawamdya - Giza - Egypt assem.mohamed.toyonix@gmail.com
+20 1278785473 linkedin.com/in/toyonix toyonix.github.io

OBJECTIVES

Backend Engineer and Computer Science graduate with strong experience in building scalable APIs, working with Linux-based systems, and automating infrastructure using Docker and Bash. Seeking a backend or systems-focused role where I can contribute to reliable, maintainable software and continue growing in backend and DevOps engineering.

WORK EXPERIENCE

Brokers Times

Backend Engineer — *March 2026 – Current*

- Develop and maintain scalable backend services using FastAPI and Strapi, including building RESTful APIs and adding new endpoints.
- Design and optimize database schemas and handle backend logic, ensuring performance, scalability, and clean architecture.
- Implement reliable deployment pipelines using Docker and Nginx, including blue-green deployments and expand-and-contract migration strategies for SQL systems.

ACTIVITIES

Google Developer Groups (GDG) on Campus

Community Leader — *September 2024 – August 2025*

- Led on-campus initiatives to foster an inclusive and collaborative tech community.
- Organized events, built partnerships with students and faculty, resolved conflicts, and supported student leadership development.

ECPC (Egyptian Collegiate Programming Contest)

Contestant

- **Finalist** — September 2024
- **Qualification Round Participant** — August 2023

EDUCATION

Bachelor of Computer Science
Misr University for Science and Technology (MUST)
September 2022 – July 2026
CGPA: 3.9 / 4.0

PROJECTS

GDGoC MUST Automation App

- **Description:** A self-hosted tool that automatically downloads Bevy session recordings and uploads them to YouTube, with real-time progress tracking.
- **Tools:** Node.js, Express, TypeScript, HTMX, Docker, YouTube Data API v3
- **Source Code:** github.com/ToYoNiX/gdgoc-records-upload-tool

Doctor Booking API

- **Description:** A RESTful API that enables patients to book doctor appointments with secure role-based access for doctors and patients.
- **Tools:** JavaScript, Express.js, MongoDB
- **Source Code:** github.com/ToYoNiX/doctor-booking-api

Pharmacy Management System

- **Description:** A full-stack web application for managing pharmacy operations with role-based access and dynamic, hypermedia-driven interfaces.
- **Tools:** Python, Django, SQLite, HTML, CSS, JavaScript
- **Source Code:** github.com/ToYoNiX/pharmacy-management-system

CS50 Tasks Application

- **Description:** A task management web application for creating, organizing, and tracking tasks with smooth, hypermedia-driven navigation.
- **Tools:** Python, Flask, Jinja, SQLite, HTML, CSS, JavaScript
- **Source Code:** github.com/ToYoNiX/cs50-tasks-web-app

TECHNICAL SKILLS

Tools & Frameworks

Linux, Docker, Ansible, Express.js, AngularJS, HTMX, Nginx Proxy Manager, Vim, VS Code

Programming Languages

Bash, Python, JavaScript, TypeScript, HTML, CSS

Databases & Data Tools

SQLite, Microsoft SQL Server, MongoDB, Microsoft Excel, Microsoft Access

Research & Documentation

Obsidian, Zettelkasten

SOFT SKILLS

- Community leadership and team coordination through on-campus technical initiatives
- Public speaking and presentation skills, representing teams and university at multiple events
- Mentorship and guidance for students in technical and competitive programming settings

LANGUAGES SKILLS

- Arabic: Excellent, English: Very Good

COURSES

Github Foundations

Datacamp - February 2026 - Certificate

MEAN-Stack Development

NTI/Itida - Ministry of Communications and Information Technology – August 2025 – Certificate

Forward Program

McKinsey & Company – December 2024 – Badge

CS50x

Harvard University – September 2024 – Certificate

Crash Course on Python

Google – March 2024 – Certificate

Linux: Introduction to Shell Scripting

Coursera – December 2023 – Certificate
